

INTRODUCING DRUM NOTATION

A DRUM BEAT!

TIPS ON HOW TO PLAY:

- Play the **hi-hat** with your **right hand**
- Play the **snare** with your **left hand**
- Play the **kick/bass drum** with your **right foot**
- If you can, keep your left foot held down on the hi hat pedal.

The key to playing this beat, and much of drumming, is building independence between both your hands and both your feet. You will probably find that your instinct is to play the bass drum and the snare drum at the same time - which is not what you do.

Practice trying not to do this. Good luck!
